

Toronto Auto Transport

Toronto Auto Transport Service

We now offer auto transport service from Toronto to across Canada or Ontario. We can even move your car to Ottawa and even Oshawa! Cars can be moved by rail, truck or drive away service. Transit time can vary from the same day to a few weeks for Toronto to Vancouver auto moves or Toronto to the Maritimes.

Shipping by rail is usually the best option but not always a possibility, especially if you are located far away from the Toronto main rail station. In these cases you have 2 other options.

- Auto transport by truck
- Auto transport by drive away service

Both options have their merrits and you will have to make the decision as to what is best for you. Shipping by truck is safer but takes longer and can sometimes be more expensive. It really depends on the value you put on your car. It also depends on how close you are to Toronto truck depots or railway station. Please contact us for further details of if you have any questions
